PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience in telecommunications and enterprise software development. Specialized in automation-driven network operations, ETL pipelines, real-time monitoring systems, and SLA assurance platforms. Proven experience designing scalable backend systems that process millions of records, eliminate manual workflows, and improve operational efficiency by over 80%. Strong background in Python, PHP (Laravel), SQL, and Linux environments.

CORE COMPETENCIES

- Automation Engineering & Process Optimization
- Network Operations Automation
- ETL Pipeline Development
- Real-Time Monitoring & Alerting Systems
- SLA Monitoring & Violation Prevention
- Database Design & Query Optimization
- RESTful API Development
- Incident & Ticket Correlation Automation
- Linux & Shell Scripting
- Agile / SDLC Execution

PROFESSIONAL EXPERIENCE

Ericsson – Software Engineer

March 2022 – Present

- Designed and developed automation tools replacing manual Excel-based reporting processes.
- Built ETL pipelines processing large-scale network data from SAP IQ and MySQL.
- Engineered real-time monitoring systems integrated with ENIQ to track KPIs and SLA thresholds.
- Developed automated SMS and Email alert frameworks for performance degradations.
- Optimized backend logic to process millions of records with sub-second response times.
- Managed full SDLC from requirements to deployment and maintenance.
- Collaborated with cross-functional teams to deliver scalable automation solutions.

Brmaja – Back-End Developer

March 2020 – March 2022

- Developed RESTful APIs for high-traffic applications.
- Integrated third-party services and optimized SQL database performance.
- Implemented scalable backend systems using PHP (Laravel).
- Worked in Agile development environments.

mobi-med – Full-Stack Developer

November 2018 – February 2020

- Developed responsive web applications for healthcare systems.
- Designed secure database schemas and backend services.
- Built frontend interfaces integrated with backend APIs.

TECHNICAL SKILLS

Programming: Python, PHP (Laravel), JavaScript (jQuery, Ajax), SQL

Databases: MySQL, SAP IQ

Automation & Monitoring: ETL Development, KPI Monitoring Systems, ENIQ Integration, Alerting Systems

Tools & DevOps: Docker, Git/GitHub, REST APIs, Linux, Shell Scripting

Methodologies: Agile/Scrum, Software Architecture, Design Patterns, SDLC

EDUCATION

Bachelor's Degree in Mathematics and Computer Science

Faculty of Science, Al-Minofia University | Sept 2011 – July 2017

LANGUAGES

Arabic – Native

English – Professional Working Proficiency
